WHAT?

What do you know about summershredding? NOTHING?!

We know a place where you can find a big fat glacier 3200 m above the sea level, a place where you can find snow all through the year.

We know many smooth guys who built up an incredible park for you on our glacier. We know how to do big parties with BBQ, beer and "Tirolerpfelf".

We know a place where there are summer temperatures but still winter snow conditions, perfect to shred for six weeks in the hot season...

Have you heard about the Summer Camp in Val Senales? No, you didn't?! Then push the button and continue reading!!!

Federico Bellini

Schnalstal is a very charming place. When I was a child my dad was telling me beautiful stories about his battles with the fishes over there, the untouched nature and the beauty of this place. I'm pretty sure this didn't change much.

Today there is the possibility to ride a snowpark for every kind of riding skills built by F-Tech snowpark construction. F-Tech stands for perfect shapes and awesome park projecting.

You can reach the park in only ten minutes and the snow is very good at this time of the year.

Eventough you put your board aside every now and then just sit back, chill, go fishing, join a barbecue and feel „into the wild“ in this beautiful, unforgettable place.

Matt Georges

Second time for me in Val Senales and I have to admit I really love it!!

I think I will come back every year at the end of the season in April/May to enjoy the last powder runs, the italian food, the coffee, the barbecue and the perfect park!! Even if they are lazy sometimes it's always a pleasure to shoot with Italian riders such as Simon Gruber, Plazy, Max Stampfl, Tato Chiala, Lukas Goller, Bambi etc...

The park in Val Senales is really nice to ride and also to shoot. From far away it looks like a maquette, it looks so perfect! And when you come closer you understand why...!! The park is shaped with a laser!

They have different stuff for different riding so everybody can shred together and still ride at his own level.

About the resort itself, it is really big and you can sleep upthere in a big house at almsot 3000m High ! Such a nice experience last year with the Pirate crew !!

Ah and it's good for parties !!! you don't have to drive you can just sleep in the grass between cows (if it's not snowing 40 cm in may...)

from: Arco – Italy

Eleonora Raggi

I can't help but spend as much time as possible in Val Senales during spring and summer! I feel like home, maybe because of the virtue and hospitality of the Gentlemenriders and F-tech crew? Anyway, one can find absolute freedom and peace here, however without forgoing whacky activities like golfing, fishing, epic grill parties and the evenings at Leo's pub. The next day you get up early and in an instant you are on top of the glacier. Far away you're already able to see the formation of the Gentlemen Riders Nitro park, built and shaped with absolute precision. You won't believe it! During the last shooting I was assisting the build-up of the mega spine. The accuracy of the F-tech guys' work was breathtaking, always assisted by one or two snowcats. There's little to criticize about Alex's crew. His team not only includes the best riders from "Bella Italia" but additionally they are also astonishingly well prepared and fierce.

If you mention F-Tech parks anywhere, you'll always get positive feedback. In the middle of the F-Tech crew's chaos you'll always see the folly passion that pushes those guys in what they're doing. Sometime they may seem somehow kamikaze in their actions, however one thing's for sure: they believe in it!

Lorenzo Verdinelli

Val Senales is definitely one of my favourite spots. It just makes me feel like home and the job F-Tech did on this mindblowing park is just amazing. This little lost valley makes you friend with everyone; waiters, cablecar operators, shapers, shop owners. Eventough you went there for only a week they surely made you feel like a good old friend. What about the park? Just watch the faces of some of the international pro's in the pirate movie which was directed on this park or in SMITH's catalogue. You definitely won't forget their smile.

We surely speak about one of the best and greatest parks in Italy and maybe one of the best places for summer and springtime in the Alps. Almost all the Italian riders did their runs on this park in the past and today – and they absolutely will do so in the future!

Rider's opinion

photo: mmppfilms.ch

Gian Simmen

I have damn good memories of Schnalstal. Back in the days i still remember that i was learning and practicing one of my favorite tricks, the bs 5, in the pipe on the glacier right here. But also today, unfortunately without pipe, the Gentlemenrider's Nitro Park Val Senales is still one of europe's best summer snowboard spots Doesn't matter if you are pro, soulbro, jibber or if you just love to ride, you will surely have lots of fun on the park built by F-Tech. Last year at the SMITH shooting we've been surprised by perfect shaped kickers in all sizes and variations. The support from Bergbahnen AG, F-Tech and Gentlemenriders was perfect. Everyone had a smile on his face. After riding the fun continued down in the valley with sk8ting, soccer and fishing. For me it was a perfect fotechshoot, awesome shots turned out and this place leaves good memories.

I am pretty sure it is one of the best parks in Europe and i can only recommend it!

My first time in Schnalstal was for filming park sessions with ONBOARD and board.tv. This year will be my third time but definitely not the last! This resort is perfect for summer with his snow conditions, the nice lake in the middle of the town and the funny skate park.

For me it is spot number 1. The shaping crew is the best I've ever seen and their obstacles made me stomp a bs 1260 late cork. But they are not only famous for shaping but also for their incredible barbecue the chilly atmosphere and the rocking evenings at Leo's Pub. I just can't wait being there for july!

it's my sixth year now helping the f-tech crew so I participated at the construction of the very first parks in Schnalstal. I spend my summertime here with parkshaping and with the incredible growth of the park also my riding skills have grown. the secret formula of Schnalstal? The professionalism of F-Tech, the very best snow mobile drivers and shapers with passion. The collaboration of these three parts sets up the perfect symbiosis to be able creating a super park like this one. I'll be coming back over and over again, wakin' up early to get the best snow, doing some party but not too much to be able riding. Just come and join us! Perfect conditions and lots of fun are waiting for you!

Filippo Kratter

I still remember when i was 15 years old. Me and my brother got one week of summercamp as a gift from my mom to improve our riding skills. since this very first time at this place I'm definetly in love with it and return again and again. I learned lots of tricks here and met some of my best friends. Times have changed and so did riders, obstacles and the climate. But Schnalstal still remains one of the most important and best places for snowboarding in Italy. F-Tech guarantees the best structures and optimized shaping. You have never been here? Grab your board, jump in your car and go there - you'll be stoked!

Inside outlaw.

Just because you're at the top of the game doesn't mean you got there the same way everyone else did. Only Shaun White has a front row seat to the future, because he alone stands at the precipice of what's possible. But his hunger will never fade. He's well aware that it's all of his to gain and also all of his to lose.

And that keeps his head in check. Although his star is meteoric, his feet are firmly grounded. It's that same balance of phenomenal talent and determined attitude that permeates from the culture here at Oakley. Nobody knows just how far we can go, but we all know what it takes to get there.
